

NWC REHABILITATOR GRANT REPORT 2020 SUZY NETHERCOTT- WATSON, WILDCARE QUEANBEYAN

Many thanks go to the NSW Wildlife Council for the grant for the macropod enclosure improvements at Bywong. A new shed is now in place. It means I now have the capacity to use the joining shed with the courtyard space or the larger enclosure, and the larger enclosure can now be used as a standalone space with its own shed. A fixup of the roof of the joining shed, and a water tank and guttering installed means water collection is now possible too.
