

GRANT REPORT 2020 – BILL WATERHOUSE, Native Animal Rescue Group

Your targeted grant has really met a need we have been feeling for a long time as we keep getting more and more injured adult wombats into care.

What we end up with is four various- sized Intensive care pens all fully lined and wired-in to keep out flies, rodents and possums! They can be opened up between to add space for the patients if necessary or kept separate.

We have added funds to include winter- heated boxes and air- conditioning for all year- round temperature control.
