

# Susan Blackwood, F.A.W.N.A.

Thank you for your generous Grant. We are thrilled to have such a large and good quality Aviary. It has been in use for six months, housing dozens of birds from Ducklings to Pelicans.

Throughout the rain it has remained weather and vermin proof. The flooring is porous synthetic grass with sand and mulch. The pond is portable for use in other enclosures.

The photos show two unrelated Tawny Frogmouths , a pelican with stitches in her neck, and a duck family.

Thank you again for your support
