Wildlife Rescue South Coast

Wombat enclosure

The 2021 NWC grant was very much appreciated and enabled us to purchase steel sheets to extend one of our existing wombat enclosures. It gave a nice large outdoor area with shady large trees inside. We also built an indoor section attached to the existing older pen. The new extended setup has four exit/entry wombat flaps and three exit/entry gates/doors for us.

The enclosure has three burrows with one accessible by us at every tunnel and “nest”.
