

NWC Grant Report 2022: Dolphin Marine Rescue Animal Rehab Trust

The grant awarded to Dolphin Marine Rescue (DMART) for \$1834 contributed to the purchase of a new bird aviary.

Dolphin Marine Rescue provides rehabilitation to over 100 plus marine animals yearly along the North Coast of NSW. In the (2021-2022) financial year we have received over 60 sea birds that came into care.

By receiving this funding and purchasing this bird aviary, it greatly assists Dolphin Marine Rescue in improving our current sea bird rehabilitation facilities and care of these injured sea birds, it will also allow us to intake more patients and provide better welfare for a range of different species from seagulls, shearwaters to cormorants and pelicans.

Dolphin Marine Rescue would like to express its gratitude to the NWC for this grant.

Kind Regards,
Kieran Marshall
