

F.A.W.N.A. - ICU - C. Winner

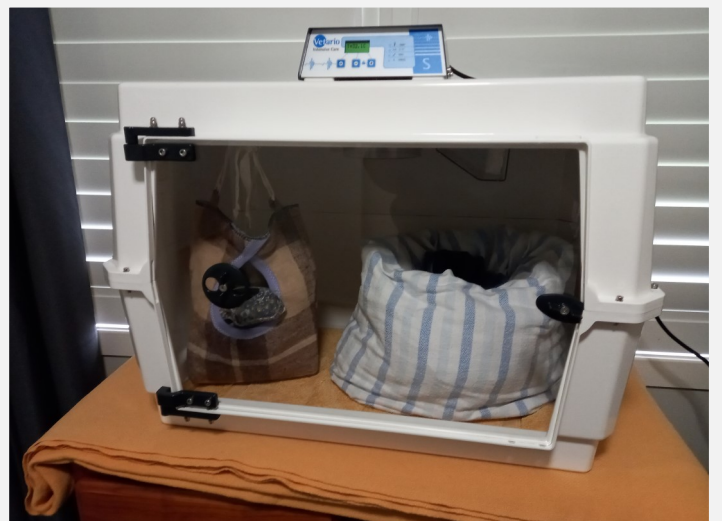

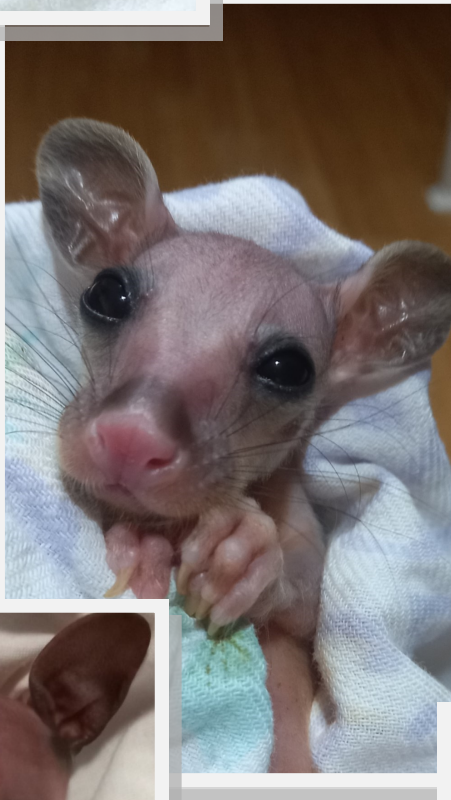

In 2022 I applied to NSW Wildlife Council for a wildlife rehabilitators grant.

I was successful and received \$1400 to purchase a Vetario S50 ICU for the intensive rehabilitation care of my intake of different wildlife species.

Recent wildlife in my care , Red-necked wallaby (left) Common brushtail possum (centre) and Swamp Wallaby (bottom I), have benefitted from the controlled environment, temperature and humidity giving them a good start to their recovery and the best chance of a successful return into the wild.

I am very grateful to NWC for this grant funding and having access to such excellent equipment has only been made available to me through this grant.
