

Kelly Fernance,

FAWNA

In 2022, I applied to the New South Wales wildlife Council for an enclosure grant to rehabilitate wildlife. I was successful with my Grant and receive \$2885 for multi species demountable enclosure for the rehabilitation of different wildlife that came into my care.

The enclosure has been a huge success in the rehabilitation of multiple bird species such as galahs rainbow lorikeets, kookaburras and tawny frogmouths. The enclosure gives the birds the freedom for flight during recovery with all being released back into the wild. I'm extremely grateful to the NWC for this grant. It has increased the capacity for bird rehabilitation in our area. This also means the enclosure gives other FAWNA wildlife carers in this area access to a large flight enclosure.

With kind regards, Kelly Fernance
