

# NWC Wildlife Rehabilitation Grant Application 2022-2023

## NTWC - Jen Dawning - Grants to assist in the purchase of materials to build an animal enclosure.

This application was for the construction of a 10m x 10m enclosure, primarily for housing orphaned and/or injured young Macropods such as these:

Unfortunately progress in developing the facility has not been anywhere near quick enough. Our main issues have been dealing with elderly parents having to relocate to supported care accommodation and their and our illnesses.

Most of the framework has been purchased and progress is, albeit slowly and sporadically, being made.

Original site for enclosure

Current progress

Unfortunately, we are dealing with yet another mini health crisis with our parents which, as I'm sure you will understand, is our main priority.

Again, our sincere apologies for this process being so protracted. We will get this project completed as soon as possible.

Many thanks,  
Jen Dawning
