

Rescue and Rehabilitation of Australian Native Animals Inc.

We sincerely thank the Council for granting RRANA the money to rebuild the Macropod enclosure at our Thomas Street location.

For many years our Mammal Co-ordinator has constantly battled the elements tending to macropod joeys in care at the above location. No complaints from her but certainly the situation with the enclosure was far from ideal.

The property now has a wonderful, purpose-built structure which allows safe access and protection from the weather for both humans and the joeys in care.

RRANA are very grateful. Projects such as this are always on our wish list but without the assistance and generosity of grants they would rarely come to fruition.

Thank you NWC for your support -

Lindy Hunt - President
