

## NWC Wildlife Rehabilitation Grants Program 2023 – 2024

Grant recipient: Renée van der Poel, FAWNA

Grant amount: \$2950

Project description: modular multi species aviary

Receiving funding and purchasing this enclosure has greatly assisted in the rehabilitation of animals in my care. Since its arrival in November it has been occupied almost every day and has so far housed multiple brushtails, ringtails and a tawny frogmouth. It has allowed the animals to be moved to an appropriate size cage at the right time without having the stress of travelling to another carer. It has increased capacity for rehabilitation in our area and also gives other carers nearby easier access to a large enclosure.

*A big thank you to the NWC!*
