

FAWNA (NSW) INC macropod enclosure upgrade

We have been caring for and rehabilitating wildlife with FAWNA for over 30 years and can release Eastern Grey Kangaroos, Red-necked wallabies and Swamp wallabies from our 100 acre property at Collombatti near Kempsey.

To continue doing this and to support the animals' individual needs we were delighted to be awarded a NWC grant to repair, upgrade and enlarge our smaller and larger release pens.

More space for grazing has improved the animals' development and preparation for release. The support from the NSW Wildlife Council enables us to continue our work with caring for our beautiful wildlife.

Thank you NWC.
