

Glider Rehab and Release cage

Northern Tablelands Wildlife Carers Inc is extremely grateful to be awarded the grant from NWC. The grant enabled us to purchase a cage that will allow rescued gliders in our volunteers' care to retain their muscle mass during their rehab.

The cage's portability and construction as two large cages means they can be used for possums if there are no gliders in care.

Without the grant from NWC we wouldn't be able to offer gliders such great accommodation for their optimum rehabilitation..

Pictured left—easily transportable on a ute or trailer.

Pictured below: Happy bunch of volunteers with half of the cage erected and in situ
